

## MICROSOFT TEAMS VOICE CALLING

---

KEEP YOUR NUMBERS. KEEP YOUR FEATURES. KEEP YOUR SANITY.

**KEEP ALL YOUR TOOLS IN THE SAME PLACE.**

**Is your organization already familiar with Teams?  
Now you can seamlessly integrate crystal-clear voice dialing within the app!**

There are a lot of integrations that can enable native dialing in Microsoft Teams, but only ours extends your existing Business Cloud Communications voice services and phone numbers to the Teams app for a unified communication and collaboration experience.

### TRANSFORM PRODUCTIVITY WITHOUT CHANGING SERVICES

Does your organization use Microsoft Teams for messaging and collaboration and separate desk phones for voice services? Disparate tools are hard to keep up with and can reduce productivity for team members on the go. Now you can seamlessly integrate your Business Cloud Communications voice services within the Teams app to talk, chat, meet, and share in one place, on any device.

### NATIVE CALLING IN MICROSOFT TEAMS

Our integration leverages Microsoft Direct Routing to enable native dialing in the Teams app, so you can make and receive calls on any device using your existing phone number and all the advanced calling features you're used to – no additional hardware needed.

# VOICE-ENABLE MICROSOFT TEAMS WITH YOUR EXISTING TELEPHONY

Seamless communication and collaboration – talk, chat, meet, and share, and call on any Teams device.

#### Native Dialing

Make and receive external calls with your phone number on any device using Microsoft Teams.

#### Call for Less

Cymbus offers a lower cost, all-in-one alternative to Microsoft Calling Plans.

#### Anywhere Productivity

Unite your tools in one app for anywhere productivity using a range of devices.

#### Voice Features

Use all your existing calling features, star codes, voicemail, and more – directly in the Teams app.

#### Flexible Scalability

Simple per-user, per-month pricing and user-by-user roll out ensures you're in control of the costs.

#### Seamless Deployment

No additional hardware needed. Keep your phone number, calling features, and devices.

A better way to **connect,**  
**communicate,** and **collaborate.**
